Please assign each task a score of Satisfactory or Unsatisfactory.
Unsatisfactory in any essential task constitutes competency failure.
The student will repeat the competency at a later date.

- Discusses the plan prescription with the physician. - Satisfactory   [2 pts]
- Loads the patient imaging studies into the planning computer. - Satisfactory   [2 pts]
- Accurately fuses image data sets together. - Satisfactory   [2 pts]
- Contours the appropriate anatomy on the image data set. - Satisfactory   [2 pts]
- Successfully places the isocenter using simulation data. - Satisfactory   [2 pts]
- Correctly generates optimal beam angles for specific anatomical area. - Satisfactory   [2 pts]
- Generates plan with appropriate energies. - Satisfactory   [2 pts]
- Able to manipulate ROI/PTV constraints in the optimizer to obtain an optimal plan. - Satisfactory   [2 pts]
- Accurately optimizes and generates a concomitant boost plan. - N/A
- Accurately generates an individual DVH or composite DVH (for correct # of fractions). - Satisfactory   [2 pts]
- Understands the concept of prescribing to a point vs. prescribing to a volume and is able to adjust the plan % normalization as needed. - Satisfactory   [2 pts]
